

## WE INSULATE YOUR PROJECT WITH CONFIDENCE!

thermotec® insulation not only shaves weeks off your construction time, but also prevents sound and thermal bridging, as well as mould growth.

All this thanks to our thermotec® products: little water, little binder = short drying time!

For special requirements, we also offer insulation materials that, in addition to the properties mentioned above, are non-combustible and highly resistant.

Take advantage of our possibilities and play it safe with thermotec®!

### Your applications with thermotec®

- ① thermotec® floor insulation
- ② thermotec® vault filling
- ③ thermotec® wall backfilling
- ④ thermotec® attic insulation
- ⑤ thermotec® basement backfilling
- ⑥ thermotec® floor slab insulation
- ⑦ thermotec® flat roof slope insulation
- ⑧ pooltec® FLOOR Premium pool floor slab insulation
- ⑨ pooltec® WALL Premium pool backfilling

- 👍 When insulating the floor, you have the option of backfilling the bathtub in one go! This keeps the bathing water nice and warm!

The drainage pipes are also soundproofed.

For the pool, the trench for the pipes can also be filled with insulation. This completely encloses and protects the pipes and conduits.

**Take advantage of our extensive options and stay on the safe side with thermotec®!**

We are happy to advise you! Use the contact form <https://www.thermotec.eu/kontakt/#kontaktformular>

or call the service line **+43 79 42/778 11-250**. A thermotec® project manager will take care of your request!"
